Ove Hoegh-Guldberg is the director of the Global Change Institute at the University of Queensland. Hoegh-Guldberg studied marine science at the University of Sydney and is also director of the Centre for Marine Studies. He has also collaborated with groups including the Great Barrier Reef Foundation, the Royal Society and the World Bank, and works on the effect of climate change on coral reefs, which he notes are depended on by half a billion people around the world for their livelihoods and tourism.
